Report on

Guest Lecture on "Employment Opportunities in Agricultural Engineering"

Event Name: Guest Lecture on "Employment Opportunities in Agricultural Engineering"

Introduction to Event:

A Guest Lecture was conducted at Aditya Engineering College (A), Surampalem by the Department of Agricultural Engineering to enlighten the students regarding their future growth prospects. The objective of this programme was to let the students know the present scenario of employment. In 2019, the estimated youth unemployment rate in India was at 23.01 percent. According to the source, the data are ILO estimates. For the past decade, India's youth unemployment rate has been hovering around the 22 percent mark. The youth unemployment rate refers to those in the workforce who are aged 15 to 24 years and without a job, but actively seeking one. Generally, youth unemployment rates are higher than the adult unemployment rates, and India is no exception. Youth unemployment in India is significantly higher than the national unemployment rate. India's unemployment rate in general is not remarkably high when compared to those of other countries. Both India's unemployment rate and youth unemployment rate are below their global equivalents. The key role of an agricultural engineer is to improve agricultural production through better engineering methods, inventions, technology and equipment.
