"Job opportunities in Power and Energy Sector"

Name of the Event : Job Opportunities in Power and Energy Sector

Introduction to Event:

Career Guidance Program on "Job Opportunities in Power and Energy Sector" was conducted at Aditya Engineering College (A), Surampalem by the department of EEE to make the students learn how to Power and energy sector. The objective of this programme is to impart the knowledge on power and energy sector. Power is among the most critical components of infrastructure, crucial for the economic growth and welfare of nations. The existence and development of adequate power infrastructure is essential for sustained growth of the Indian economy. India's power sector is one of the most diversified in the world. Sources of power generation range from conventional sources such as coal, lignite, natural gas, oil, hydro and nuclear power to viable non-conventional sources such as wind, solar, and agricultural and domestic waste. Electricity demand in the country has increased rapidly and is expected to rise further in the years to come. In order to meet the increasing demand for electricity in the country, massive addition to the installed generating capacity is required. India was ranked fourth in wind power, fifth in solar power and fourth in renewable power installed capacity, as of 2020. India is the only country among the G20 nations that is on track to achieve the targets under the Paris Agreement. Keeping this in view, the department has organised this training programme for the benefit of the students.
