Suggest any courses to be added to /removed from the curriculum

It has been suggested to include more courses with a specific focus on the program, like VLSI and embedded systems. Create a path for employment in the core sectors as opposed to the IT industries.

Suggest any new topics/technologies/tools/modules to be learned by students to make them industry- ready.

Courses related to Artificial Intelligence and Machine Learning creates more opportunities. Suggested to include advanced course which are related to the topics specified.

Give any other suggestions for improving the Curriculum

More electives needed.

The following are observations on Alumni feedback and action need to be initiated:

- 1 Facilitate the students with more online courses as a part of curriculum which will help the students in self learning.
- 2 More number of students are showing interest in choosing their career in IT industry. It is recommended to include a greater number of coding related courses to help the students.
- 3 Students need domain specific courses to drive them towards core sector for employment and also towards higher students.

Suggest any courses to be added to /removed from the curriculum.

Employability skills courses helps students to a great extent. Suggested to look into it.

Suggest the skills to be acquired by our students to meet the industry requirements.

Students are suggested to keep themselves updated with the latest technologies. The curriculum should help the students in this regard.

Any other suggestions on Curriculum.

Such courses which provide knowledge regarding the related program and also the cutting-edge technologies to be included in the curriculum. This may be taken care of.

The following are observations on Employer feedback and action need to be initiated:

1. Introduce employability skills as a part of curriculum so that students can be industry ready.
2. Make internships and live projects a compulsion and encourage students to take active part in live projects and internships.
3. Wide opportunities are waiting for the students in the IT industries in the fourth coming years ahead. Include as many coding related courses as possible so that students can meet the global requirements.

13. The books prescribed/listed as reference in curriculum are relevant, appropriate and updated.

Give suggestions for improving the Curriculum

1. More number of electives to be included in the syllabus.
2. Industrial visits should be a part of curriculum every year
3. More program specific courses should be included in the curriculum from the early semesters itself.

The following are observations on Faculty feedback and action need to be initiated:

1. It would be helpful for the students to great extent if they have more choices in electives where they can opt their own choices.
2. Industry institute interaction helps a student in understanding the current trends and emerging technologies to shape themselves according to the industry needs.
3. It would be helpful enough to the students if the electives have equal weightage for core subjects and IT related courses.

Give your suggestions for improving the curriculum.

1. Syllabus should be framed in a lucid manner so that a below average student can also understand the concepts easily. This has to be addressed.
2. Industry institute interaction should be mandate for to provide more practical exposure to the student community.
3. If possible, make mini project work as a part of curriculum in all the semesters.

The following are observations on Student feedback and action need to be initiated:

1. lessen the number of courses to be completed by student in the last semester so that one can focus more on project work and employment and placement related courses.
2. Need real-time applications which are related to domain as a part of projects and laboratories which should be included in the curriculum.
3. Introduce few more laboratories in the curriculum.
