Project:

Project Name: Trust Based Routing Protocol for Multi-Hop Wireless Networks.

Language used: Java.

Description: In a multi-hop wireless Network the mobile nodes acts as a router to forward packets, which are generated from the other nodes. There is no fixed infrastructure for routing purpose. The multi-hop wireless Network nodes need to spare their resources and time in order to accomplish this task. However malicious nodes do not co-operate but makes use of fairness and performance of the network. These type of nodes reduces the network performance. In this paper, we propose a Trust based routing protocol for multi-hop wireless Networks TBRP (Trust Based Routing Protocol) based on
