A report on Value Added Course

Course name	Hands on Training on CFD Analysis	
Introduction to Course	This course offers excellent guidance on how to judge which numerical approximations are acceptable and appropriate for solving a wide range of practical problems. Of equal importance is the manner in which results are interpreted. Advice is provided which allows the correct decisions to be taken, based on results which are known to be reliable. Interaction is encouraged throughout the course, with the planning and design of a complete CFD project and examples of simple hand calculations, mesh designs and solution designs being set for the class to complete.
