

# ADITYA ENGINEERING COLLEGE

An Autonomous Institution

Approved by AICTE • Permanently Affiliated to JNTUK • Accredited by NAAC with 'A' Grade

Recognised by UGC under sections 2(f) and 12(B) of UGC Act, 1956

Aditya Nagar, ADB Road, Surampalem - 533437, Near Kakinada, E.G.Dt., Ph:99498 76662

## Programme: Thermal Engineering

### Vision & Mission

The screenshot shows the website's header with the Aditya Engineering College logo and navigation links. The main banner reads "Get in Gear with MECHANICAL ENGINEERING" with a background image of students in a lab. Below the banner, the "Department of Thermal Engineering" is highlighted. The "Our Vision" section states: "To be a nationally preferred knowledge hub in Mechanical Engineering Department with commitment towards critical thinking, quality research and innovation." A "Quick Links" sidebar on the right lists various pages, with "Our Vision" selected. At the bottom, there is a "Join Today" button and a Windows taskbar showing the date as 18-10-2022.

### Vision

This screenshot is similar to the previous one but displays the "Our Mission" section. It lists three mission statements: M1: "Inculcating strong mathematical & (and) computing fundamentals that form the baseline for modern day solutions with emphasis on design and development"; M2: "Impart leadership & interpersonal skills for the stake holders"; and M3: "Collaborate with industry, academia, & R&D organizations for excellence in teaching, research and consultancy services." The "Quick Links" sidebar remains on the right, and the "Join Today" button is at the bottom.

### Mission

## Program Outcomes (POs)

The screenshot shows the website of Aditya Engineering College. The header includes the college logo and navigation links: Home, About Us, Autonomous, Infrastructure, Examinations, Academics, Research, Departments, Campus life, Placements, IQAC, Downloads. A dropdown menu for 'Departments' is open, showing options like Our Vision, Our Mission, Programmes offered, PO (selected), PSO, PEO, Faculty / Supporting Staff, Advanced Learners and Slow Learners, Facilities, and Newsletters. The main content area is titled 'PROGRAM OUTCOMES' and lists five outcomes:

- PO 1: Scholarship of Knowledge:** Acquire in-depth knowledge of specific discipline or professional area, including wider and global perspective, with an ability to discriminate, evaluate, analyze and synthesize existing and new knowledge, and integration of the same for enhancement of knowledge.
- PO 2: Critical Thinking:** Analyze complex engineering problems critically, apply independent judgment for synthesizing information to make intellectual and/or creative advances for conducting research in a wider theoretical, practical and policy context.
- PO 3: Problem Solving:** Think laterally and originally, conceptualize and solve engineering problems, evaluate a wide range of potential solutions for those problems and arrive at feasible, optimal solutions after considering public health and safety, cultural, societal and environmental factors in the core areas of expertise.
- PO 4: Research Skill:** Extract information pertinent to unfamiliar problems through literature survey and experiments, apply appropriate research methodologies, techniques and tools, design, conduct experiments, analyze and interpret data, demonstrate higher order skill and view things in a broader perspective, contribute individually/in group(s) to the development of scientific/technological knowledge in one or more domains of engineering.
- PO 5: Usage of modern tools:** Create, select, learn and apply appropriate techniques, resources, and modern engineering and IT tools, including prediction and modeling, to complex engineering activities with an understanding of the limitations.

At the bottom, there is a green bar with 'APPLY FOR ADMISSIONS' and 'Join Today' buttons. The Windows taskbar at the bottom shows the date as 18-10-2022 and time as 09:18.

This screenshot continues the list of Program Outcomes (POs) from the previous one:

- PO 6: Collaborative and Multidisciplinary work:** Possess knowledge and understanding of group dynamics, recognize opportunities and contribute positively to collaborative-multidisciplinary scientific research, demonstrate a capacity for self-management and teamwork, decision-making based on open-mindedness, objectivity and rational analysis in order to achieve common goals and further the learning of themselves as well as others.
- PO 7: Project Management and Finance:** Demonstrate knowledge and understanding of engineering and management principles and apply the same to one's own work, as a member and leader in a team, manage projects efficiently in respective disciplines and multidisciplinary environments after consideration of economic and financial factors.
- PO 8: Communication:** Communicate with the engineering community, and with society at large, regarding complex engineering activities confidently and effectively, such as, being able to comprehend and write effective reports and design documentation by adhering to appropriate standards, make effective presentations, and give and receive clear instructions.
- PO 9: Life-long Learning:** Recognize the need for, and have the preparation and ability to engage in life-long learning independently, with a high level of enthusiasm and commitment to improve knowledge and competence continuously.
- PO 10: Ethical Practices and Social Responsibility:** Acquire professional and intellectual integrity, professional code of conduct, ethics of research and scholarship, consideration of the impact of research outcomes on professional practices and an understanding of responsibility to contribute to the community for sustainable development of society.
- PO 11: Independent and Reflective Learning:** Observe and examine critically the outcomes of one's actions and make corrective measures subsequently, and learn from mistakes without depending on external feedback.

The bottom of the page features the same green 'APPLY FOR ADMISSIONS' bar and Windows taskbar as the previous screenshot.

## MECHANICAL ENGINEERING

Department of Thermal Engineering

### PROGRAM SPECIFIC OUTCOMES

**PSO 1:**  
Develop thermal systems that efficiently generate, transmit and distribute thermal power, by considering environmental aspects.

**PSO 2:**  
Design and develop equipment?s for various thermal systems to improve their standards and performances

**PSO 3:**  
Apply appropriate simulation tools like MATLAB, and analysis tools like ANSYS & Fluent, for modelling and evaluation of various Thermal systems

## MECHANICAL ENGINEERING

Department of Thermal Engineering

### PROGRAM EDUCATIONAL OBJECTIVES

**PEO 1:**  
Choose professional career with a solid foundation in mathematics, science and engineering.

**PEO 2:**  
Solve real time engineering problems using professional knowledge and skills resulting in significant societal development.

**PEO 3:**  
Demonstrate multidisciplinary skills to analyse engineering issues in a broader perspective with ethical responsibility towards sustainable development.

**PEO 4:**  
Adapt interpersonal skills, leadership and team building to achieve their career goals and pursue lifelong learning and higher education necessary for successful profession.
